DFG2 Steps for SCD2

- 1) Add ***StartDate*** and ***EndDate*** to Dimension Table
- 2) Add Surrogate Key to the Dimension
 - Keys WITHOUT Meaning
 - Keys WITH Meaning
- 3) Create a Bridge Query
- 4) Merge the Surrogate Key to the Fact table

Demo

Demo overview

- Daily Data snapshots stored in Azure SQL DB copy to Bronze LH
- “Data Massage” with DFG2 and load to Silver LH
- Prep data (including new SKs) for Gold Layer LH
- Merge the Surrogate Key to the Fact table
- Create PBI Report based on Gold Layer LH

What to Remember when implementing SCD2

- 1) Delete relationship between Fact and Dimension
- 2) Add **Start** and **End** Column
- 3) Create surrogate keys
- 4) Create bridge query for ***every date***
- 5) Replace FK in Fact table with surrogate keys
- 6) (re)Create the relationship between the Fact table and Dimension table using the new keys

Thank You!
